

Summary

Lower Savannah Council of Governments (LSCOG) Bicycle-Pedestrian Accommodation Master Plan

Project Steering Committee
PSC Meeting #1

August 23, 2024 @ 10 am – 12 pm (Aiken County Government Center, 1930 University Parkway, Aiken, SC)

Attendees

Brian Heape, SCDOT DEA 7
Lyle Lee, SCDOT Office of Planning
Chris Williams, SCDOT Asst. District Traffic Engineer
Kevin Webber, SCDOT, District 7
Efrem Dantzler, SCDOT District Maintenance
Joe Sturm, SCDOT Office of Planning
Preston McClung, Orangeburg County Planning

John McLaughlin, Calhoun County
Christine Chandler, LSCOG Transit
Guillermo Espinosa, SCDOT
Jean Crowther, Alta
Timothy Tresohlavy, Stantec
LaTonya Derrick, Stantec

Summary

Notes taken during the meeting are saved to Mural: [LSCOG - PSC#1 • Stantec \(mural.co\)](#)

Welcome/Introductions & Schedule – (City, Stantec)

Guillermo welcomed members to PSC meeting #1, introducing the project team, reviewing roles & expectations.

Project Process / Schedule / Roles – (Stantec/Alta)

Stantec reviewed today's agenda, the planning process, study area, and provided some definitions for Accommodations, Bikeway, and Pedway. Stantec reviewed the project schedule, and our four (4) PSC meeting tasks. The project webpage is: www.BikePedSC.com with a tab for LSCOG and an interactive webmap to promote on social media and share with stakeholders.

Existing Conditions & Discussion – (Stantec/Alta)

The project team reviewed existing data assembled to date, with the intention of providing the sources, limitations, and description of how we will utilize these data. The team is seeking feedback and comments on completing the picture (are we missing anything?), identifying emphasis areas (important factors), and sharing the community long-range vision or needs.

The project team presented data on

- Roadway characteristics
- Network connectivity
- Estimated demand, using StreetLight and activity centers
- Vulnerable Road User (VRU) considerations
- Safety considerations

Discussion from PSC members:

- Shoulder width data is less reliable or consistent than other datasets, so we largely excluded for LTS analysis
- Connect our team with:
 - Amy Johnson, Aiken Safe Cycling Instructure
 - Jennifer Beale, Aiken Traffic Director
- Review of existing conditions data (slides), and return comments within the month of September

Action Items/ Next Steps – (Stantec)

- Share the project website www.BikePedSC.com and Interactive map
- Contribute to the Interactive map www.bikepedsc.com/lscog
- Provide transit service data (routes, stops, etc.) and website links for more information
 - Follow up with Christine Chandler to request these data
- List of community organizations that should be involved in this regional planning process

Stantec + Alta will be working to incorporate feedback from today's discussion, summarize our data inputs and methodology, and develop an emerging network for PSC#2 (October).

2

Roles & Expectations

Stantec / Alta — facilitating the 'process'

- Synthesizing information
- Technical assistance and best practices

SCDOT — aligning with state needs / programs

- Seeking consistency and repeatability for other COGs

COG members — the local experts

- Area knowledge / community needs or vision
- Identifying the "**who**" needs to be involved?

3

Your turn...

Name
Organization
Role

... This regional plan will be **beneficial** to my organization because...

4

Today we will cover...

1. Project Process & Schedule
2. Existing Conditions
3. Discussion! } *40-min*
4. Action Items & Next Steps

5

Project Process & Schedule

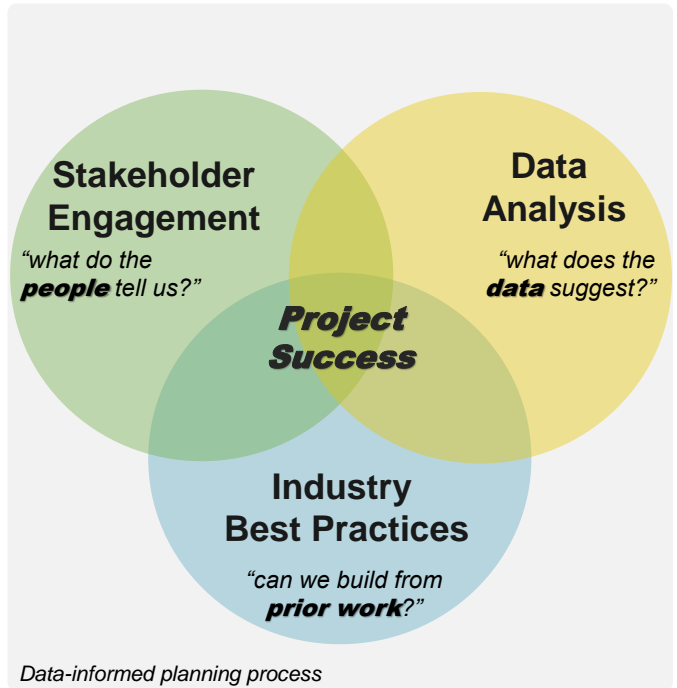

1. Project Process & Schedule
 - a. About this Pilot
 - b. Planning Schedule
2. Existing Conditions
3. Discussion!
4. Action Items & Next Steps

6

About this Pilot

PURPOSE –

to establish a consistent, repeatable process for the promotion, prioritization, and coordination of needs for walking, biking, and accessing transit along state-owned roadways.

7

Planning... not Construction

An initial step

- “Pre-engineering”

Long-term visioning / strategy

Data-informed

Prioritization of needs

Conceptual at best

8

Study Area

Calhoun County
Orangeburg County
Bamberg County
Allendale County
Barnwell County
Aiken County

... **excluding** ARTS jurisdiction

Definitions

Within the context of this project...

Accommodations: physical infrastructure that supports walking, biking, or accessing transit, and generally within the public rights-of-way.

Bikeway: all types of bicycle facilities, ex:

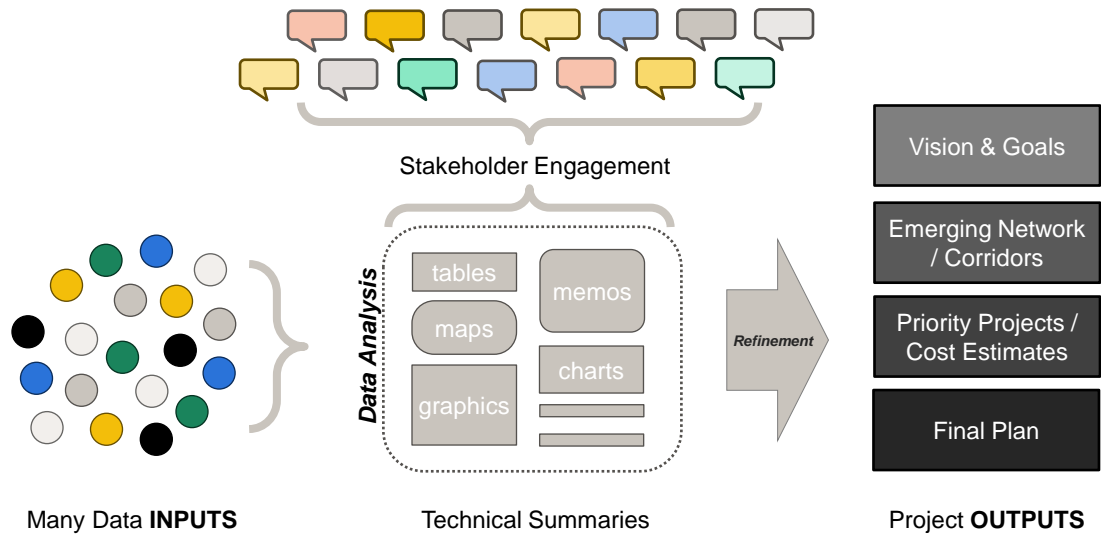

- Paved shoulders
- Bicycle lanes / Buffered Bicycle lanes
- Separated Bicycle lanes
- Shared Use Paths / Greenways / Trails

Pedway: all types of pedestrian facilities, ex:

- Crosswalks / Curb ramps / Transit stops + amenities
- Sidewalks / Sidepaths
- Shared Use paths / Greenways / Trails

Generalized Planning Process

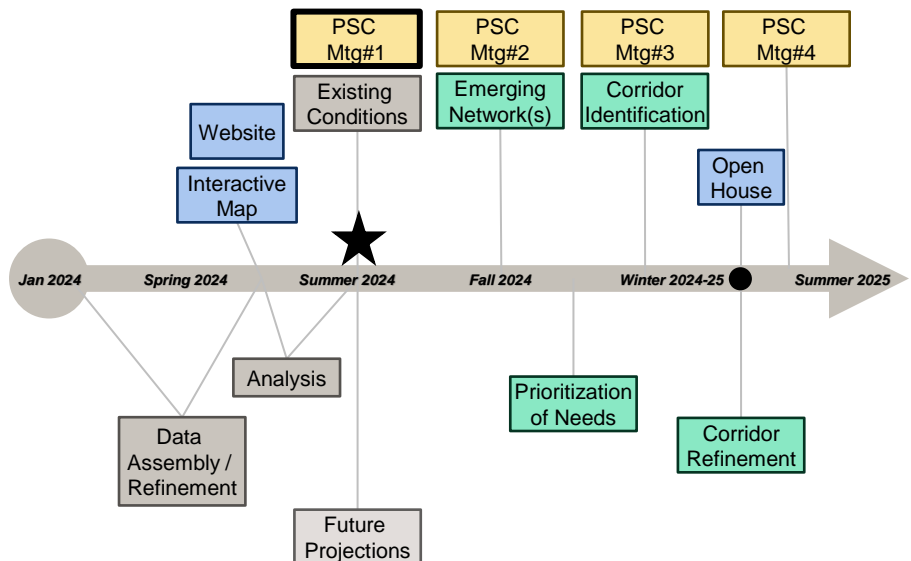

REGIONAL BICYCLE AND
PEDESTRIAN ACCOMMODATIONS
MASTER PLAN

11

Schedule

Generalized ~15 months
Subject to change

SCDOT Office of Planning

SCDOT Regional Bike & Pedestrian Planning PILOT

About Central Midlands Lower Savannah

Welcome!

ABOUT:
The South Carolina Department of Transportation (SCDOT) is working collaboratively with regional partners to accommodate, prioritize, and coordinate the demand and feasibility of walking, biking, and transit accommodations for all users of the state-owned highway system in South Carolina. This process will review the state-owned roadway system for prioritized walking/biking improvements that relate with:

- SCDOT's Complete Streets Policy (Dept Directive #28)
- SCDOT's Regional Mobility Program (RMP)

The SCDOT is supporting this goal by developing pilot Regional Bicycle-Pedestrian Accommodation Master Plans (RBAMP's) in collaboration with two (2) regional planning agencies - Councils of Government (COG).

What will this pilot accomplish?
For this pilot, the SCDOT and its partners will review corridors of importance that

How long will this process take?
This pilot will include the Central Midlands Council of Governments (CMCOG) and

16

Existing Conditions

1. Project Process & Schedule
2. Existing Conditions
 - a. Roadway Characteristics & LTS
 - b. Network Connectivity / Gap
 - c. Live / Work / Play
 - d. Vulnerable Road User (VRU) analysis
 - e. Safety analysis
3. Discussion!
4. Action Items & Next Steps

REGIONAL BICYCLE AND PEDESTRIAN ACCOMMODATIONS MASTER PLAN

17

Existing Conditions – Two Parts

We are sharing...

- *Data inputs / sources / limitations*
- *The data suggests*
- *How we will use it*

We are seeking your comments on:

- *Completing this picture – Anything missing?*
- ***Emphasis areas*** – Important factors?
- *Long-range vision / needs*

18

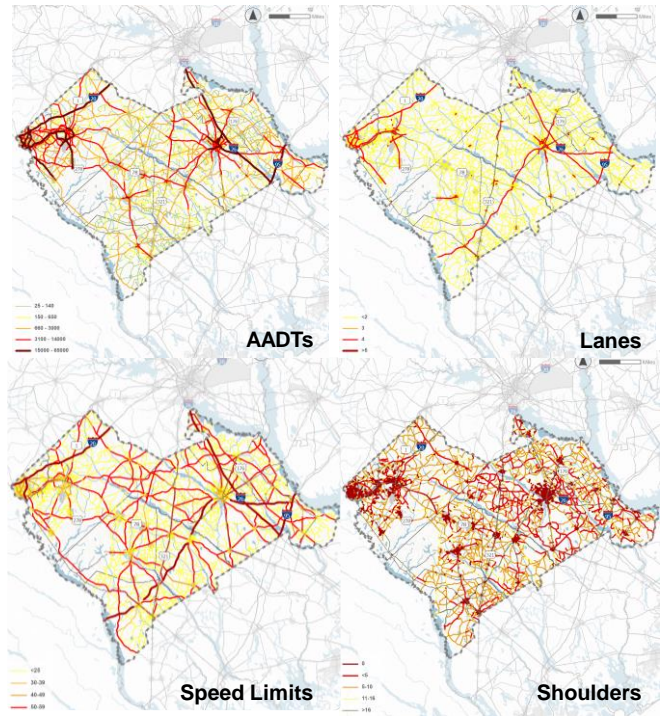

Roadway Characteristics

Data inputs: SCDOT

- LRS Highways (AADTs, lanes, shoulders)
- Speed Limit Highways (posted speeds)
 - Assumptions for ~74% of miles
- Other Roads (local, unpaved)

Perfect: **No**

Available: **Yes!**

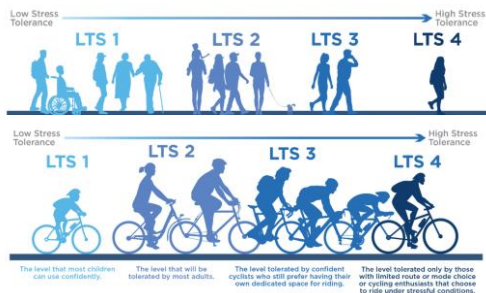

19

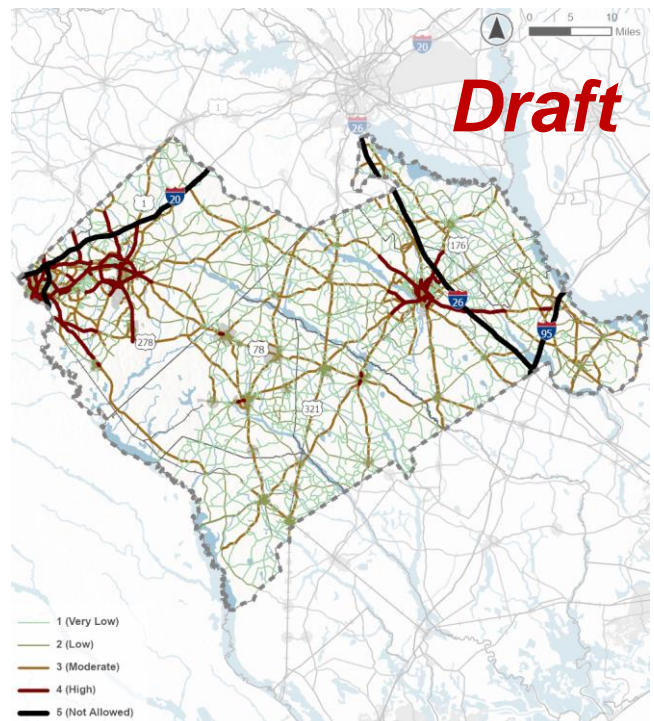

Assessment of LTS

Level of Traffic Stress (LTS)

- Posted speed
- Traffic volume
- Lanes
- Shoulder widths

Source: FDOT

21

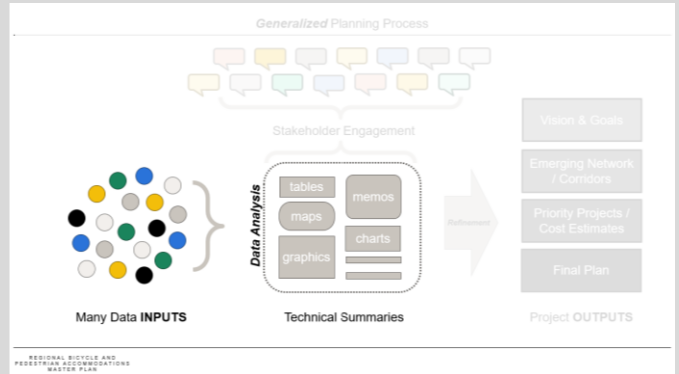

How we are using these data...

Contributes to our understanding of **existing roadway infrastructure** (baseline), potential data limitations, and **repeatability** for other COGs.

Utilized during prioritization process (future)

Discussion: *What might we be missing?*

Draft

22

Existing Conditions – Two Parts

Reminder

We are sharing...

- Data inputs / sources / limitations
- The data suggests
- How we will use it

We are seeking your comments on:

- Completing this picture – Anything missing?
- **Emphasis areas** – Important factors?
- Long-range vision / needs

23

Network Connectivity

Existing sidewalks, bikeways, and greenways – **MANY INDIVIDUAL FILES**

- Number of miles / Trend over time

Gap analysis: we are looking for...

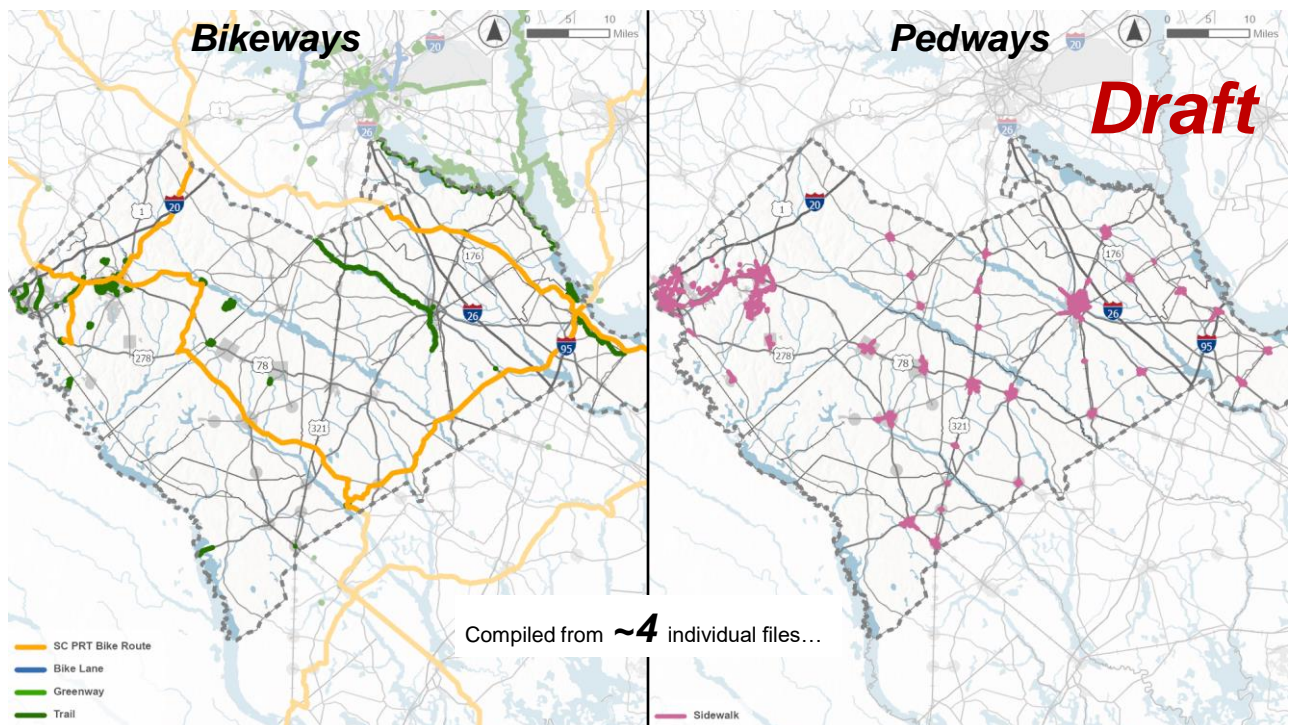

- Rural corridors between cities / towns
- Segments missing within cities / towns and near destinations or transit stops

How do we best identify “desire lines” or worn paths in your communities? (StreetLight)

How do we acquire transit routes / stop locations?

24

25

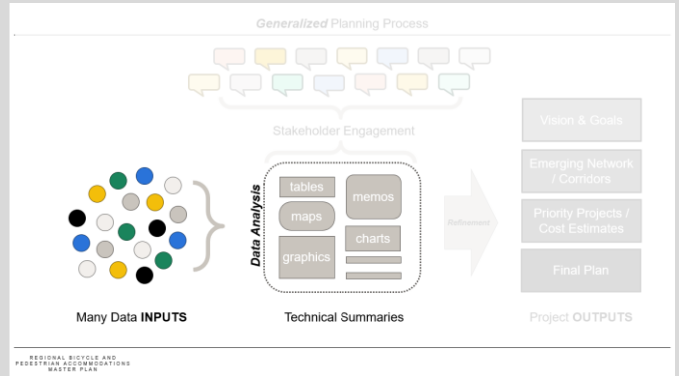

How we are using these data...

Contributes to **near-term needs** to extend or connect facilities to overcome barriers

Discussion: *What might we be missing?*

Draft

26

Existing Conditions – Two Parts

We are sharing...

- Data inputs / sources / limitations
- The data suggests
- How we will use it

Reminder

We are seeking your comments on:

- Completing this picture – Anything missing?
- **Emphasis areas** – Important factors?
- Long-range vision / needs

27

StreetLight data

What is it?

Pings on Mobile Devices, GPS

How?

SCDOT has conflated these data to the entire network across the State of SC!!

Why?

Provides sense of existing travel for multiple modes, by TOD and Trip Purpose

Use open-source grid

Measure how close is each grid to key destinations & allocate census block group information

Assign travel amounts using StreetLight data

Combine for final live / work / play score

Compare across region(s)

alta

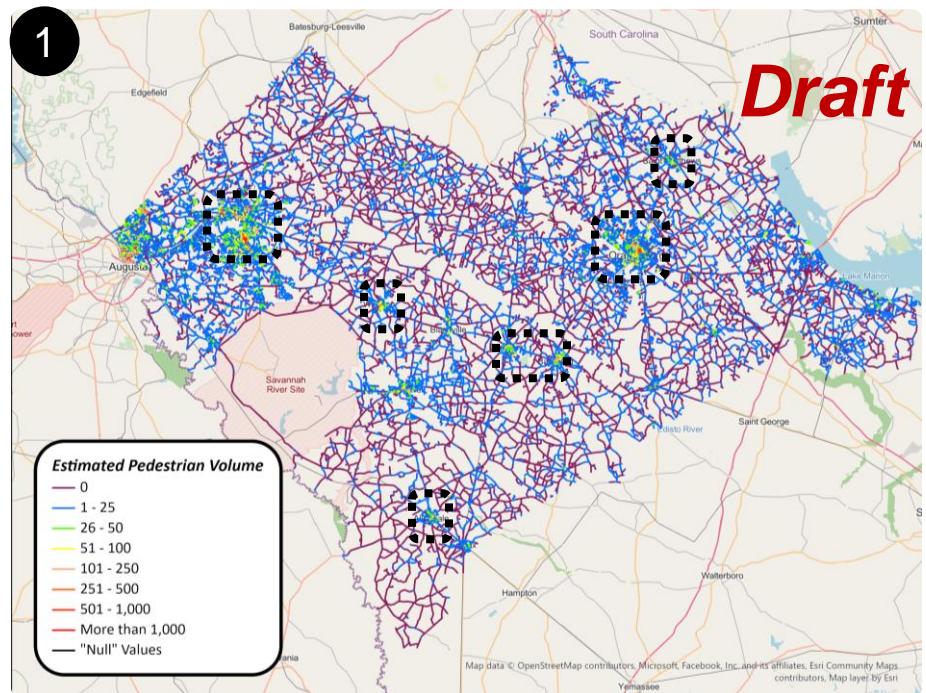

28

Estimated Demand

StreetLight 2021 = travel patterns for different corridors

- Statewide (SCDOT)

alta

29

StreetLight 2021 = travel patterns for different corridors

- alta**

StreetLight 2021 = travel patterns for different corridors

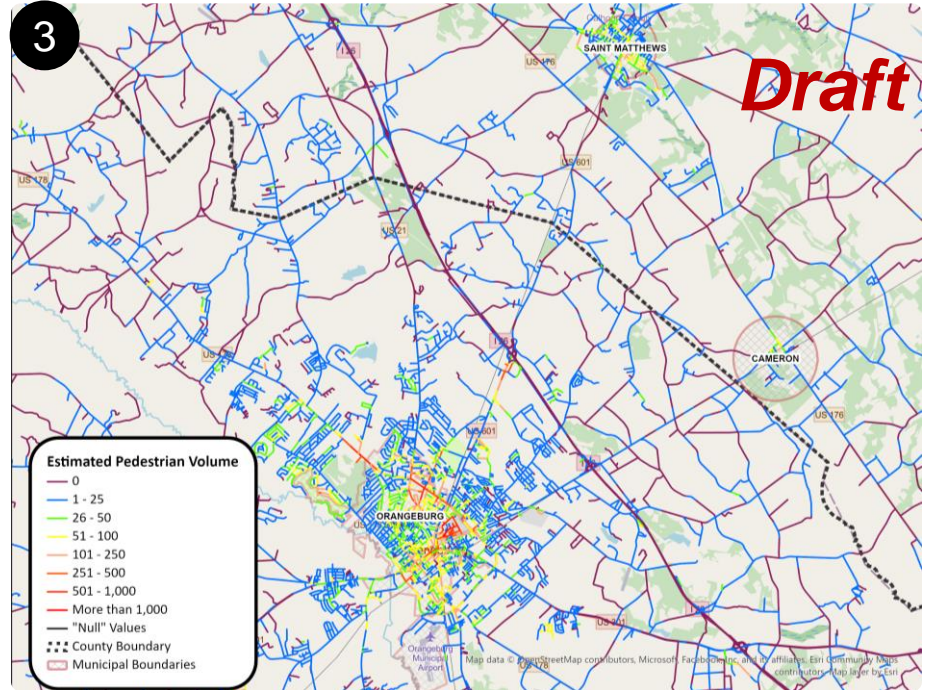

- alta**

Estimated Demand

StreetLight 2021 = travel patterns for different corridors

- Statewide (SCDOT)

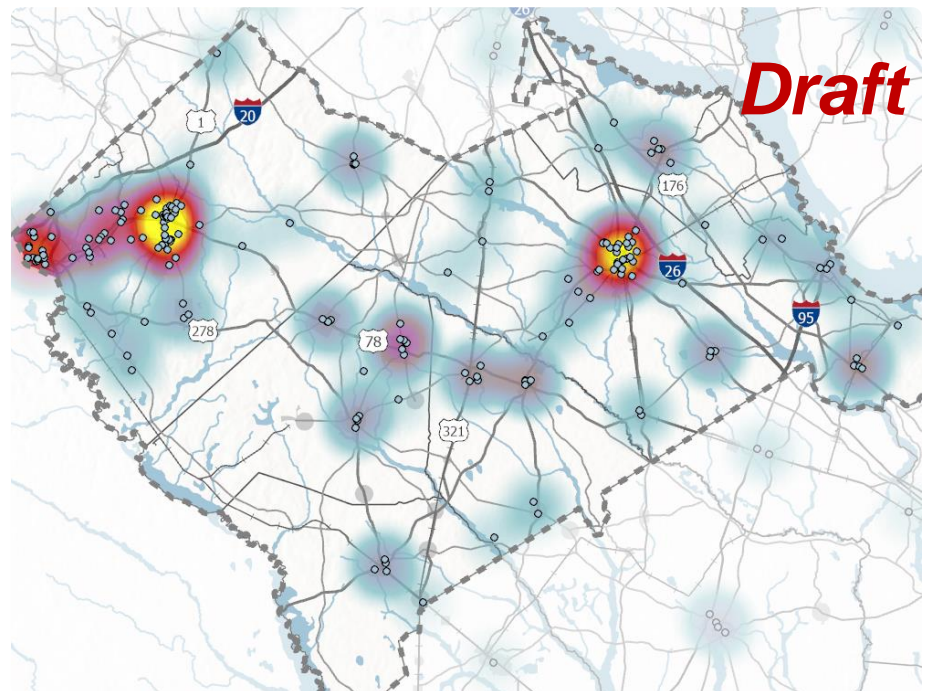

32

Live / Work / Play

Community destinations

- Parks
- Schools / Colleges
- Shopping centers / Grocery stores

33

How we are using these data...

Contributes to our understanding of **existing demand** – *where / what / how many?*

Discussion:

- *What other measures for “demand” may be available?*
 - *How thorough or reliable?*
 - *Regional or local-scale?*

35

Reminder

Existing Conditions – Two Parts

We are sharing...

- *Data inputs / sources / limitations*
- *The data suggests*
- *How we will use it*

We are seeking your comments on:

- *Completing this picture – Anything missing?*
- **Emphasis areas** – Important factors?
- *Long-range vision / needs*

36

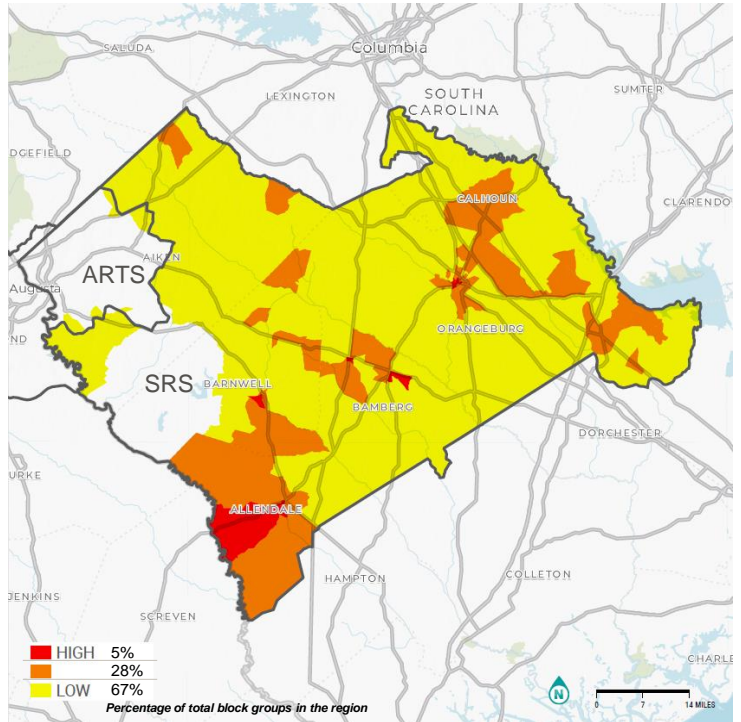

Vulnerable Road User

Vulnerable Road Users:

1. BIPOC
2. Low Income
3. Median Yr Structure
4. Mobility impaired
5. Zero vehicle HH
6. Youth (<= 15 years)
7. Senior (>65 years)
8. Limited English Proficiency

- 80% test (1,0)
- Sum of all 8 factors

How to create an index

37

How we are using these data...

Vulnerable Road Users... generally walk, bike, or ride transit in higher proportions, and may have limited access to a personal vehicle.

Discussion:

- Are these the locations that you anticipated? Why or why not?
- Are there local or regional measures of 'vulnerability'?
- Anything else on VRUs that you'd like to share?

39

Reminder

Existing Conditions – Two Parts

We are sharing...

- Data inputs / sources / limitations
- The data suggests
- How we will use it

We are seeking your comments on:

- Completing this picture – Anything missing?
- **Emphasis areas** – Important factors?
- Long-range vision / needs

40

Safety

Bicycle and pedestrian crash trends (2018-2022)

Source: SCDOT

Crash severity codes:

- K: Killed / Fatality **KSI**
- A: Incapacitating / Severe Injury
- B: Minor Injury
- C: Possible Injury
- O: Property Damage Only

Examining risk factors = Over-representation

Higher proportion of fatal (K) and severe injury (SI) bicycle and pedestrian crashes at **NIGHT** (dark conditions)

- **57% KSI** vs. 43% non-KSI occurred from **6 PM to Midnight**
- **18% KSI** vs. 6% non-KSI occurred from **Midnight to 6 AM**.
- **74% KSI** vs. 48% non-KSI occurred during **night light conditions**.

SPEEDING is associated with a higher proportion of KSI crashes.

- **22% KSI** vs. 2% non-KSI associated with speeding

41

Safety

Bicycle and pedestrian crash trends (2018-2022)
Source: SCDOT

alta

COG
LOWER SAVANNAH
Council of Governments

42

How we are using these data...

Contributes to **risk factors** that contribute to unsafe walking / biking conditions

- Directly (fatal or serious injury)
- Indirectly (*choosing* to not walk/bike)

Discussion:

- Does this align with your expectations?
- Does this conflict with any prior safety studies within your region?
- What might we be missing?

alta

43

Discussion!

1. Project Process & Schedule
2. Existing Conditions
3. Discussion!
4. Action Items & Next Steps

REGIONAL BICYCLE AND PEDESTRIAN ACCOMMODATIONS MASTER PLAN

44

Your thoughts on...

What are YOUR most important **factors** for improving walking & biking?

- *(what should be prioritized?)*

What might we be missing?

Does this align with your expectations?

Does this conflict with any prior safety studies within your region?

What other measures for "demand" may be available?

- *How thorough or reliable?*
- *Regional or local-scale?*

45

Action Items & Next Steps

1. Project Process & Schedule
2. Existing Conditions
3. Discussion!
4. Action Items & Next Steps

REGIONAL BICYCLE AND PEDESTRIAN ACCOMMODATIONS MASTER PLAN

48

Action Items & Next Steps

Your Homework is...

- Add to the **Interactive map** www.BikePedSC.com
 - Barrier / Destination / Safety / Other
 - ~2 month deadline (Sept-Oct)
- List of transit agencies in your region
 - Website links to routes/stops
- List of **community organizations** that should be involved in this process

We will be working towards...

- Incorporate your direction from today
- Summary of data inputs / methodology
- Emerging network development (PSC#2)

49

Thank you.
